## Mini Project

- Automated Attendance Management System Using Face Recognition

Technologies Used: Front end: Html and Python, Back end: SQL

This project helps me to improve my skills in both frontend and backend.

Face recognition is among the most productive image processing applications and has a pivotal role in the technical field. Recognition of the human face is an active issue for authentication purposes specifically in the context of attendance of students.

- Twitter Sentimental Analysis

Technologies Used: Python

Sentiment analysis deals with identifying and classifying opinions or sentiments expressed in source text. ... We present a new feature vector for classifying the tweets as positive, negative and extract peoples' opinion about products.
